balance at the credit of the
on 30-6-19 is expected to
be Rs 5,640 only and after
reserving Rs 1400 for the
prescribed minimum
the surplus will be only
Rs 4,220. The Ml council
can not therefore contri-
bute more than Rs 4000
for the water supply
project without
a loan.

15) If the Ml cl has to
raise a loan they will
have to provide for the
annual interest and
instalment they will
also have to pay
maintenance charges
The normal income
of the Municipality is Rs 6,600
the normal expenditure Rs 6000
The financial position of
the Ml cl is not
factory and even the House
water rate equal to 50 %
of the house tax it will

Rail-way for its own purposes in the immediate future. The requirements for improvements may be placed roughly at about three thousand including the improvements of surroundings and provision of compound, Verandahs etc. There will then be a need available for making a substantial contribution and the only question for consideration is one of expediency and propriety in which Govt. alone can decide.

2. In this connection I wish to point out that Govt. have already in a way committed themselves to a definite policy for the utilization of the unexpended surpluses of Municipal institutions which are to be funded and invested, the interest therefrom being utilized for the benefit of Municipal institutions generally and also for other purposes but no connection between the objects of the original endowment and the present ~~grant~~ grant to the Municipality of Bangalore for the [illegible]

agreement to bear half the estimate of the water supply scheme that must have been apparent before they were aware of the cost of the project. Having regard however to the resources of the Municipality, it seems as if they can not possibly contribute anything more than about 4000 Rs. They can not also obviously raise a loan, as they have pleaded inability to bear even the annual maintenance charges amounting to Rs 1500/

42 Next, the drainage project is a very costly one, and the Municipality can contribute towards the work

43 The Surgeon Capt's note at para 20 shows that a substantial sum can be contributed from the Temple funds. Leaving the excise revenue due to the temple, a sum of about 60,000 Rs may perhaps be expected In para 22, the amount is promised to be ascertained

NOTE—Contn. sheet.

Sanction has also accorded to the utilization of the interest-earnings of a contribution of Rs 10,000 for the special improvements of Mussoorie institutions in addition to the State grant of Rs 10,000 and an Engineering establishment for a systematic inspection of institutions and for preparation of estimates for repairs and improvements. Even this additional grant will not go a very long way in affecting the temple buildings the determination of ~~problems~~ and the cost of the Engineering establishment is bound to be growing one owing to the incremental scale of the Assistant Engineer's pay.

5. Now that the requirements of the various institutions have been individually examined it is found that barely 5/4 lacs can be made available for incorporation in the Fund and the interest earnings from this sum will be just sufficient to cover the cost of the two items detailed

In this sum is interpreted all the available surplus of the Chamarajanagar temple viz Rs 1,35,000 which is made up of the amounts now invested and standing at the credit of the temple and the arrears of the Excise Revenue which is due to the temple but still in the hands of Govt. (In the latter case the amount stated is approximate as actual figures are not yet available) Now if full effect is to be given to the orders already passed by Govt., it is submitted that no substantial amount can be made available from the temple funds to meet the cost of the projects in question

1st Member & Dewan

7/8
11/3/19

Sd Ramaswamy Refers to Kalasa & Narasingarajapuram temples

NOTE—Contn sheet

Serial No

As far as I can see, there is no particular connection between Muzrai funds and the projects for water supply and drainage to Chamarajanagar town, beyond the accidental circumstance that the resources of the Municipality are scanty while the temple has a surplus to its credit. But this cannot by itself justify an appropriation of temple funds for what are essentially municipal purposes A religious endowment is in the nature of a trust created (in the case of a temple) for objects intimately connected with the worship of the presiding deity, and as long as there is no failure of those objects, the income accruing from the endowment cannot lawfully be diverted to purposes which, however laudable or desirable in themselves, do not clearly fall within the scope of the foundation The fact that the Government is at present administering the trust, or that the endowment was originally made from State revenue, can make no difference in this respect (24) The principle is quite clear, and as far as I have been able to ascertain, ~~the principle in question~~ has never been departed from except in the instances cited below -

The First has reference to the temple of Kalasa, which in December 1897 was asked to contribute towards the cost of water supply works as well as towards the construction of an in-patients ward These appropriations were sought to be justified on plausible grounds

Note—Contn sheet

GPB—50,000—18-5-08

Serial No

such as that "the village of Kalasa might be said to exist only in connection with and for the purposes of the temple", that the water supply scheme "would be of the greatest permanent benefit to the portion of the public who were interested in its welfare and worship", and that the inpatients' ward " being of a charitable nature and highly beneficial to pilgrims and others who resorted to Kalasa, had special claims on the funds of the temple"

The contribution towards the water supply project was raised gradually from Rs 5,000 to Rs,20,000 an (2/3 of the estimate) with the prospect of being further increased, until the project itself was abandoned in 1918 as one of doubtful utility, beyond the legitimate needs of the temple or of its devotees the villagers generally

57 The second instance is that of the Temple at Nanjangud, which was ordered in May 1913 to contribute Rs 10,000 for the water supply of the town No reason is assigned in the Order beyond the very general one that the temple "benefits largely from the scheme"

57 These, after all, are solitary instances of comparatively recent date They are clear deviations from principle, and the worst of such deviations is

GPB—50,000—18-5 08

Serial No

that they tend to facilitate further deviations until in time the exceptions grow into precedents which are difficult to resist

A further reason why such precedents should not be multiplied lies in the fact that while, on the one hand, there is no agency independent of Government competent to safeguard the interests of these religious institutions, the idea of appropriating religious endowments towards secular objects has a certain attraction about it which is bound to be fatal to the ultimate stability of these institutions

5) It is very rarely indeed that a temple is more than a portion of a town and its worshippers more than a fraction of the population To saddle it with a substantial portion of the cost of a general scheme of water supply or drainage on the ground that its devotees are benefited thereby is therefore little better than quibbling At that rate there is nothing to prevent a Police Station or a Magistrate's Court or a lock-up being financed from temple funds

6) After giving my best consideration to the matter, I regret I cannot recommend any contribution being made from the funds of the Chamarajanagar Temple. As shown in the Muzrai Secretary's note all the money that can be spared from its own needs will be required to build up a General Fund for the benefit of Muzrai institutions all over the State

Only 2 items, viz. Restoring the Chamarajapura tank & cleaning the Honda.

The original Estimate of Rs 44900/- for providing a suitable water-supply scheme to the Chamarajnagar Town has now been revised to Rs 89600*. This is in accordance with the opinion of the Central San^y Bd But Kind upee is invited to the Exec. Engineer's report (paras 4 & 5) wherein he points out that certain other works are necessary to make the Scheme a more useful one. This of course means cost. The estimate B referred to by the Exec. Engineer has not been sent.

The chief Engineer has not furnished his opinion as to whether he considers the proposed arrangements sufficient.

Assuming that only the works approved by the San^y Board may be carried out just, the question as to the source from which the cost may be met requires consideration. There are the temple funds, and there is also provision under "Other Improvements" in the State Budget. The balances are low and have undergone a reduction by the deputation of Ramanandra from Chamarajnagar, the former having been

While I am generally in accord with the views expressed in the Chairman's note dated 19/2/19 regarding the utilisation of temple funds for secular purposes I am of opinion that the benefits which the temple in question and its devotees would enjoy from the water supply scheme — which are assessed at Rs 2,500/- — would be sufficient to warrant the contribution from the temple funds.

I am not in favour of any proposal that the Committee should borrow from the temple funds.

N O T E.

Chamrajnagar Water Supply.

An estimate, amounting to Rs 44,150 for improving the water supply to Chamrajnagar town was forwarded to the Revenue Secretary in May 1919-

2 The Central Sanitary Board to whom the project was referred for opinion recommended it for adoption, but suggested that, as the Municipality was not able to finance the large cost of the scheme, only a portion of the estimate pertaining to restoring the Chamsagara tank (the source of water supply to the town) and cleansing the honda may be taken up immediately, the rest being considered when funds permitted-

3 The Revenue Secretary, on this, returned the estimate and stated that, if the Chief Engineer approved of the suggestions of the Central Sanitary Board, a modified estimate may be got up and forwarded-

4 The Chief Engineer inspected the place on 30th July 1919 and discussed the matter with the Amildar and Municipal Vice-President at Chamrajnagar. It was then settled, that for want of funds the bigger scheme might be omitted for the time being and only the improvements to the tank and honda might be carried out immediately-

5 A modified estimate, amounting to Rs 8,961 was accordingly forwarded to Revenue Secretary in September 1919-

In this estimate a lumpsum provision of Rs 1,000 had been made for fitting up 4 Meyer pumps. But as these are considered not necessary by the Chamrajnagar Municipality and the Executive Engineer, Sanitary Division, and also as now suggested by the Deputy Chief Engineer, this item may be omitted-

6 It may however be remembered that the proposals in the modified estimate have been got up with a view to reduce the cost of the scheme as far as possible and are intended only as a temporary measure which will ensure water supply to the honda even in years of scanty rainfall by effecting storage in the Chamsagar tank-

7 A ~~broader~~ longer scheme may be undertaken in the near future when funds permit and may comprise of all the essential components of a complete water supply scheme, such as a settling tank, pumping installation, service reservoir, filters, distribution system,&c., the source of supply being either Maligere or Hardanhalli tanks near the town. The cost of such a scheme may come to a lakh or more.

Bangalore,
25 November 1919.

17/1/20

No D 591

Subject - Water-supply to Chamarajnagar.

Reference - This office note, No.D.495, dated the 22nd November 1919.

Submitted to the First Member of Council, with reference to his orders dated the 13th December 1919-

2. I have discussed the question personally. As stated in paragraph 5 of this office note on the question of water-supply (attached to the note quoted above), the estimated cost of the work will be reduced by Rs 1,000, by omitting the provision made for fitting up 4 Moyers pumps. The cost of the water-supply will not exceed Rs 7,910 or Rs 8,000 in round figures-

3. The estimate, as now reduced, may be sanctioned-

4. According to the decision of the Council dated the 30th October 1919, half the estimated cost may be ordered to be met from the temple funds, the remaining half being contributed from the State Funds. The work on completion will be handed over to the Municipality for maintenance.

Secretary to Government,

Final Note by the Second Member of Council

Subject –

Water Supply Project of Chamarajnagar Town.

With reference to the gracious reply given by His Highness to the address presented by the people of Chamarajanagar in December 1917 in connection with the Improvement of the Water Supply of the town, the Public Works Department prepared an estimate for Rs.44,150/-. The Central Sanitary Board to whom the project was referred for opinion recommended it for adoption, but as the Municipal Council were unable to finance the same they suggested that only a portion of the work viz., the restoration of the Chamsagar tank and the cleaning of the Honda might be taken up immediately.

2. Accordingly, the estimate was modified and it was further revised by the Chief Engineer who has since inspected the town and has proposed after discussion with the First Member of Council that an estimate for Rs.7910/- may be sanctioned.

3. The subject was considered in Council on the 22nd January 1920 and the Council are of opinion that the project as finally revised may be sanctioned for Rs.8000/-, half the cost being met from the temple funds and the remaining half from the State funds.

4. The resolution of the Council may be approved.

Sir,

With reference to the proposed water supply project to Chamarajnagar town I am directed to state that the main bazaar charges are expected to amount roughly to Rs 15 on a year and to enquire whether the Municipal Council [illegible] is agreeable to bear with the proposed over

the entire maintenance
charges and if so, to submit
ways and means for
raising the additional
income required, as it is felt that the present financial
condition is not very satisfactory
to I am to add that
the question of financing
the initial cost of the
project and the contribution
to be laid by the Municipal
towards the same are
under the consideration
of Govt. and a separate reference will be made
in due course when the requirements of the project is ascertained
finally by the Municipality as mentioned
in the letter from
dated the 20th July last.
It. Meanwhile this reference may kindly be
treated as very urgent and a reply submitted
with the least possible delay

MYSORE PUBLIC WORKS DEPARTMENT.

CENTRAL OFFICE.

No. D. 1735

Bangalore, dated the 8th February 1919

From

S. Gulzari, Esquire,

Chief Engineer of Mysore,

BANGALORE.

To

The President of Municipalities,

MYSORE.

Sir,

With reference to G.O. No. G.11537-41/G.M.318-17-4 dated the 29th February 1918 fixing the responsibility in respect of certain matters referred to in the speech made by His Highness the Maharaja of Mysore at Chamarajnagar in reply to an address presented by the people of that place, I have the honor to forward herewith a rough project amounting to Rs. 1,13,155 for the drainage of the Chamarajanagar Town and to state that the rough scheme indicates the lines on which the drainage will have to be carried out.

2. The report by the Executive Engineer and the office note by the Superintending Engineer explain the provisions made in the estimate.

3. If the general lines are approved and the question of financing the scheme is settled, the scheme will be worked out in detail.

I have the honor to be,
Sir,
Your most obedient servant,

(Sd) R. V. Sundaramiar,

Despatched

Enclosure No 19.

Subject

Improving the water supply to Chamarajnagar Town.

Proceedings of the Central Sanitary Board in Mysore.

R e a d.-

Letter No.12048 dated the 11th October 1918 from the Chief Engineer of Mysore, forwarding a project amounting to - ₹ 44,150 for improving the water supply to Chamarajnagar town, the items of work consisting of.--

(a)	Construction of an anicut across the stream near Uttamahalli.	₹ 2,878
(b)	Construction of a feeder channel therefrom to feed the Chamasagar tank.	₹10,111
(c)	Restoration of the Chamasagar tank.	₹ 5,055.
(d)	Construction of a new settling tank with screen wall.	₹ 4,412
(e)	Improvement of the sluice to Arsinavara honda to connect the honda with the new settling tank.	₹ 2,000
(f)	Construction of two service reservoirs to be fed from the settling tank - one by gravitation and the other by means of a hand-pump	₹17,592
	Contingencies	₹ 2,102

Resolution No 7 dated the 8th May 1919

Resolved (i) that the proposed scheme be recommended to be adopted but (ii) that as the works involve a heavy initial outlay and annual maintenance charges amounting to ₹ 1,500, the following essential improvements may be effected first, pending a determination of ways and means to finance the scheme in its entirety.--

(a) Improvement of Chamasagar tank, and

(b) Cleansing and enclosing the Arsinavara Honda and fitting it up with 4 Lyers pumps for use by different communities.

Submits a copy of the Amildar's report regarding the benefit of water supply project for the temple and its appurtenances

---O---

Letter No.3 dated the 3rd July 1919 from the Amildar Chamarajanagar Taluk to the Deputy Commissioner, Mysore District Mysore.

Adverting to your No.C.3472 L.B. of 18-19 dated the 24th June 1919 directing me to investigate and submit a detailed report as to how far the temple with its appurtenances will be benefitted by the Water-supply project now under contemplation for the Chamarjanagar Town, I beg to report that for ordinary purposes such as Agrodaka, cooking etc., about four casks of water is required every day, on special occasions about 20 casks of water are found necessary for the temple alone In addition to this, there are 110 temple servants and their dependents who are also to be supplied with good water for their domestic purposes. In fact the whole town owes its expansion to this sacred edifice and out of 917 houses in the town, 110 belong to the Temple servants who are paid from the Temple funds. A majority of the residents here are directly or indirectly connected with the institution either as its servants or as its contractors or suppliers and as such the water supply scheme will benefit them all.
